DURING-THE-WEEK RULES — apply every trade, every week

- 50% Profit Rule:** When the condor loses 50% of its value, BUY IT BACK. You've captured half your max gain — lock it in, free the capital.
- 50% Loss Rule:** If closing costs 2× your original credit, CLOSE NOW. Never hold hoping for a reversal. Cut and protect your account.
- VIX Spikes > 25:** Close ALL open positions immediately, accept whatever P&L. High VIX means erratic moves that destroy condor positions.
- Thursday Check:** Check each position vs its short strikes. Stock within \$2? Close it before Friday. Never gamble on expiry-day pinning.
- Friday — Let Expire:** Still open and stock is comfortably inside the band? Do nothing. Let it expire worthless and collect the full credit.
- Fill Trouble:** Drop limit \$0.05 every 10 min at open. Still unfilled after 30 min? Skip for the week. Never chase a fill.

HISTORICAL BACKTEST — realistic \$4–\$5 spreads · 7% risk/trade · compound sizing

Scenario	Trades	Win Rate	\$37k → End	Net Return	Max Drawdown
Calm VIX (<22) — 10 calm weeks	100	84%	\$69,585	+88% (+75% net of fees)	7.9%
August 2024 — VIX spiked to 65	40	77.5%	\$44,410	+20% (+15% net of fees)	16.4%
Minimum win rate to break even	—	64%	—	—	—
